

eNotify

At the beginning of their lessons, do your teachers know which students are absent and which students will turn up late?

Could you improve safeguarding by sharing information about absence and lateness in a more efficient way?

Does your organisation need to save money on its administrative costs?

eNotify is a new software product that will revolutionise the way your organisation manages the reporting of student absence, lateness and other appointments.

eNotify makes sure that everyone gets the message exactly when they need it.

The staff notification screen updates the instant a notification is received, so that staff have up-to-date information on student absence at their fingertips:

The screenshot displays the eNotify web application interface. At the top left is the eNotify logo, and at the top right is the user information: "College: VLE College" and "User: Nicky Pettit Logout". Below the header is a navigation menu with links for Home, AWON, Add Notification, Dashboard, Reports, and Admin. The main content area is divided into two sections. On the left, under "09 OCT 2018 AT A GLANCE", there is a summary of notifications with a "Show only my notifications" checkbox. It lists categories: Unwell (7), Running Late (6), Leaving Early (0), and Other Absence (1), with a total of 14. Below this is a "CHOOSE A DATE" section with a calendar for October 2018, where the 24th is highlighted. On the right, under "VIEWING DATE: 09 OCT 2018", there is a table of notifications.

ID	Surname	First Name	Notification	Time of Notification	Status	View

143933	Chambers	Tim	Running Late	09/10/2018 08:17:00		Q

Notifications can be raised in two ways. Staff can take information from the college's current absence reporting method, eg. dedicated absence line, texts, or emails - and input this information into eNotify themselves. There is also an optional mobile phone app which can be downloaded by students, allowing them to raise their own notification directly. The two methods can be used in conjunction or separately, both generating a notification which appears in eNotify, also sending an email to any associated staff members.

Build Date: 15/02/2018 17:42:10

eNotify will save you time!

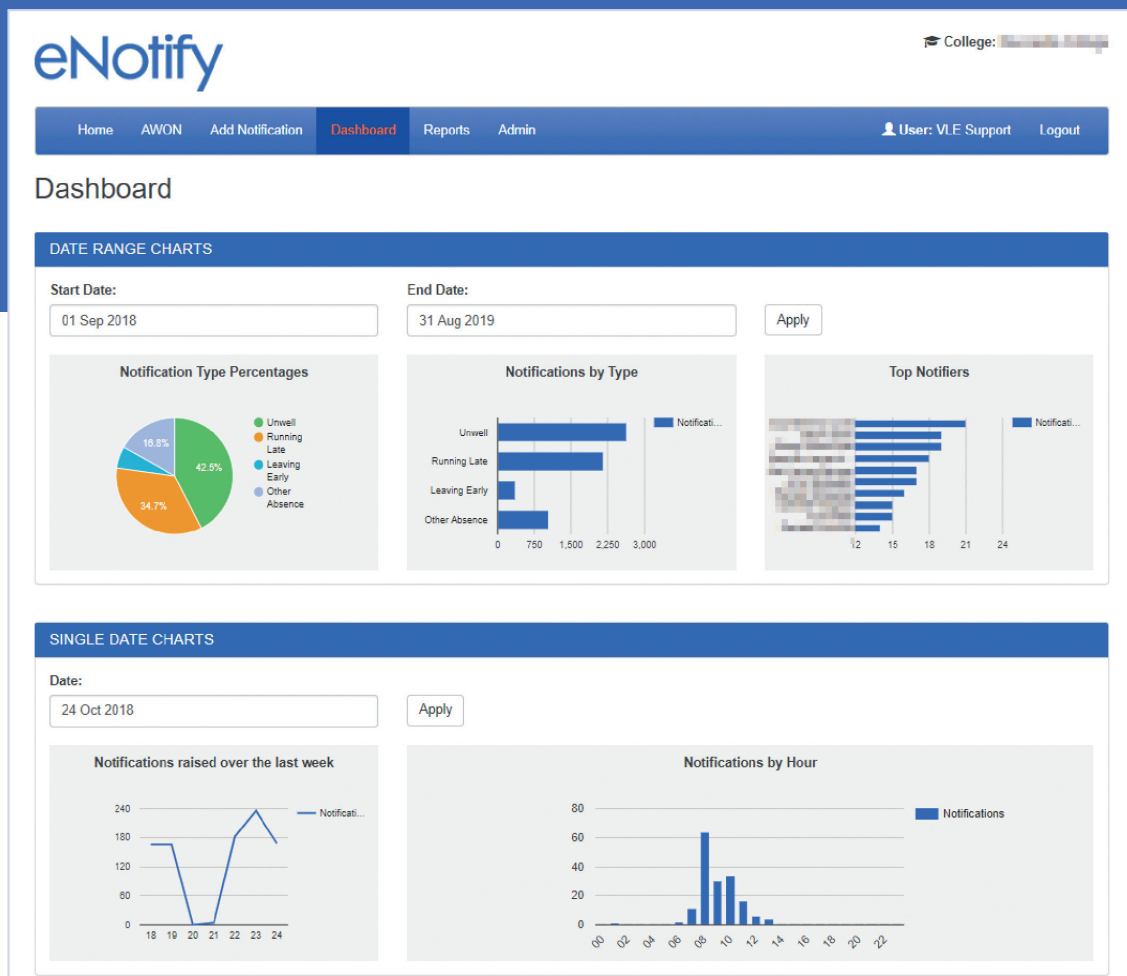

When a notification is received, it automatically identifies which course the student is on and will notify the relevant tutor.

“...students find the app really easy to use and staff like the simplicity of eNotify, which allows them to add notifications themselves should absences be reported via means other than the app.”

Rachel Gibson – Newcastle College

eNotify collates statistics about the notifications and displays them in a live dashboard, enabling the analysis of notifications types and trends. This will allow you to spot patterns and therefore target resources to deal with persistent 'offenders'.

Case Study

eNotify has been hugely beneficial to Newcastle College. We have in excess of 10,000 students and previously 6 individual school offices had their own absence line, which needed to be staffed and monitored. Since we have started using eNotify, the need for separate systems has been eradicated and our absence reporting and monitoring has been streamlined into one efficient, centralised system. This has resulted in the college experiencing a significant reduction in the amount of admin time spent on this task, allowing us to focus these resources elsewhere.

eNotify is a really simple and efficient system, which enables relevant members of staff to instantly receive notification of student absence. It provides us with rich data in respect of student absence and allows us to spot patterns of absence and assist in safeguarding of students. We are able to identify, monitor and support regular absentees and easily and efficiently follow up student absence.

Students find the app really easy to use and staff like the simplicity of eNotify, which allows them to add notifications themselves should absences be reported via means other than the app.

When we first purchased eNotify we used it as a standalone product which was great, however since then we have used it in conjunction with eTrackr^{ilp} and the integration is fantastic – we are now able to access all our absence data directly from eTrackr^{ilp}, which is really handy.

Rachel Gibson, Head of Central Support Service, Newcastle College

AWON (Absent Without Notification)

eNotify now has a dedicated AWON page, displaying a list of absent students who have not notified the college. eNotify interrogates your register system and identifies those students who are absent but have not raised a notification, allowing you to quickly and efficiently follow this up.

The screenshot shows the eNotify interface for VLE College. The top navigation bar includes Home, AWON (highlighted), Add Notification, Dashboard, Reports, and Admin. The user is logged in as Nicky Pettit. On the left, there is a 'CHOOSE A DATE' section with a calendar for August 2018, where the 16th is selected. The main area displays 'ABSENT WITHOUT NOTIFICATION DATA - 16-AUG-2018' with a table of student records.

ID	Surname	First Name	Time	Description	Type	Primary Contact
143555	[Redacted]	[Redacted]	09:00	Database Systems and Analysis	E	07777 666 555

Unwell	09/10/2018 09:53:00	143914	[REDACTED]	[REDACTED]	143914: Julia Adams		09/10/18 9:53: Julia Adams - Been up all night bring sick. I've only just woken up so won't be in today sorry
Running Late	09/10/2018 09:30:00	144610	[REDACTED]	[REDACTED]	1142: Mark Trinick		09/10/18 9:30: Mark Trinick - My train is cancelled. I will miss the start of my 10am lesson. I am waiting for the next train. Hopefully be there at 10.15am
Unwell	09/10/2018 09:28:00	148614	[REDACTED]	[REDACTED]	1142: Mark Trinick		09/10/18 9:28: Mark Trinick - Not feeling well. I have a really bad headache
Running Late	09/10/2018 08:17:00	143933	[REDACTED]	[REDACTED]	143933: Tim Chambers		09/10/18 8:17: Tim Chambers - my bus has just broken down. waiting for a replacement one. Not sure what time I will arrive.

These reports can be exported as Excel, Word or PDF documents.

eNotify assists you in improving Safeguarding!

The rich data provided by eNotify could alert you to potential safeguarding issues. This will enable timely interventions in situations where any concerns have been identified.

Data Integration

eNotify will integrate with all college MI systems in order to pull through details of students and staff. It will also integrate with our outstanding ILP Product, eTrackr^{ilp}, pulling through information from the eTrackr^{ilp} database.

The screenshot displays the eTrackr web interface. At the top, the eTrackr logo is on the left, and 'Support Desk | User Help' is on the right. A navigation bar includes 'My Students', 'Assessment', 'eTutorial', 'Analysis and Reporting', and 'Setup'. A 'Change Year' dropdown is set to '2017/2018'. Below this, a breadcrumb trail reads 'You are in: Students > Details (change student) (login as student)'. A search box labeled 'Student:' is present.

The main content area is split into two columns. The left column shows student details for 'Scott Anderson - ID: 145070'. It includes a profile picture placeholder, a 'Show My Details' button, and a traffic light indicator. Personal information includes ULN: 9149359591, DOB: 11/04/2000, and Age: 18. Academic information includes GCSE English Grade: C, GCSE Maths Grade: E, and Average KS4 Point Score: 37 (equivalent GCSE Fine Grade C-). Funding Model: 16-19 EFA funding. An option to 'Omit user from eLights statistics' is also visible.

The right column is titled 'Overall Attendance & Punctuality' and features a table for 'HT 6'. The table has columns for weeks (Wk 32 to Wk 37) and an 'Avg' column. The data is as follows:

	Wk 32 21/5	Wk 33 4/6	Wk 34 11/6	Wk 35 18/6	Wk 36 25/6	Wk 37 2/7	Avg
Attendance	73%	50%	-	-	-	-	81%
Auth Attendance	73%	50%	-	-	-	-	81%
Lateness	0%	0%	-	-	-	-	11%
Punctuality	100%	100%	-	-	-	-	89%

Below the table, a note states: 'Further attendance details may be viewed under the Attendance Details tab below'. At the bottom of the interface, there is a 'Notifications' section with 'Start Date' (01 Sep 2017) and 'End Date' (15 Aug 2018) filters, and a 'Go' button. A table of notifications is shown below:

Type	Date Created	Raised By	Status	Comments
Other Absence	15/08/2018 15:29:00	1035: Sarah Jones		15/08/18: Sarah Jones Got my driving test ... read more
Leaving Early	14/06/2018 13:34:00	1142: Mark Trinick		14/06/18: Mark Trinick Had a phone call fro... read more

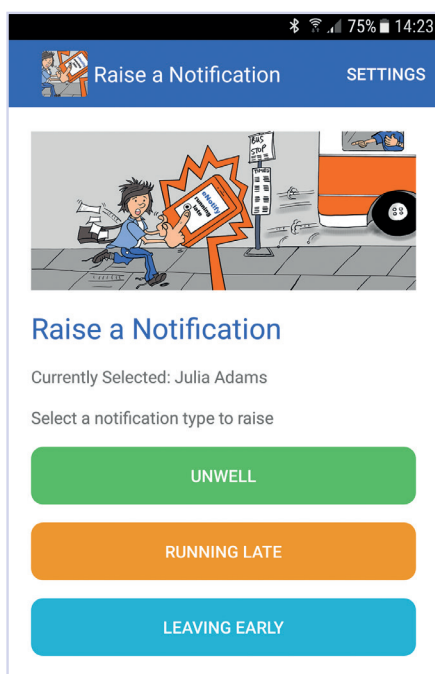

eNotify can be used as a stand alone web-based application, or as an additional module to eTrackr^{ilp}.

SAVE MONEY!

eNotify will not only improve the quality of information sharing, but will potentially allow you to make massive savings on your administrative workload enabling your staff resources to be allocated more effectively to support strategies to improve attendance.

eNotify

The screenshot shows the eNotify mobile application interface. At the top, there is a status bar with icons for Bluetooth, Wi-Fi, 75% battery, and the time 14:23. Below the status bar is a blue header with the text "Raise a Notification" and a "SETTINGS" button. The main content area features a cartoon illustration of a person running towards a bus stop with a large orange starburst notification icon. Below the illustration, the text "Raise a Notification" is displayed. Underneath, it says "Currently Selected: Julia Adams" and "Select a notification type to raise". There are three large, rounded rectangular buttons: a green one labeled "UNWELL", an orange one labeled "RUNNING LATE", and a blue one labeled "LEAVING EARLY".
